Professional Profile

Dedicated Metallurgical Engineering student at the University of Namibia, passionate about extractive metallurgy, sustainable mineral processing, and materials characterization. Strong analytical skills combined with a commitment to innovation and environmental responsibility. Seeking opportunities to apply theoretical knowledge in practical industrial settings.

Education

Bachelor of (Honours) in Metallurgical Engineering — 2026 – Present
University of Namibia (UNAM) — Windhoek, Namibia

- Relevant Coursework: Mineral Processing, Extractive Metallurgy, Materials Science, Thermodynamics of Materials, Corrosion Engineering, Phase Equilibria, Analytical Techniques
- Current Research: *Optimization of Leaching Efficiency of Copper Tailings Using Bio-hydrometallurgical Approaches*
- Academic standing: First Class Honours candidate

High School Certificate — 2021 – 2025
Windhoek High School — Windhoek, Namibia

- Graduated with Distinctions in Mathematics, Physical Science, and Chemistry
- Awarded Top Science Student (2025)

Technical Skills

Software & Tools

- Python (Data Analysis)
- AutoCAD & SolidWorks
- MATLAB & Simulink
- FactSage / Thermo-Calc
- ImageJ / Fiji
- Microsoft Office Suite

Metallurgical Expertise

- Hydrometallurgy
- Pyrometallurgy
- Mineral Processing
- Materials Characterization
- Phase Diagram Analysis
- Corrosion Engineering

Laboratory Techniques

- Sample preparation and polishing
- Optical microscopy and SEM sample handling
- Chemical analysis and titration methods
- Heat treatment and hardness testing

Projects & Research

Bio-hydrometallurgical Leaching of Copper Tailings — 2026 (In Progress)

- Performed stress analysis on critical components
- Presented design at UNAM Engineering Symposium

Certifications & Professional Development

- **Python for Data Analysis** – Coursera (2026)
- **Introduction to Mineral Processing** – EdX (2025)
- **Safety in Metallurgical Laboratories** – NAMCOL (2025)
- **Metallurgical Engineering Fundamentals** – Online Course, University of Utah (2025)

Soft Skills & Languages

Soft Skills

- Critical Thinking & Analysis
- Team Collaboration
- Technical Writing
- Problem Solving
- Project Management

Languages

- English – Fluent (IELTS 8.0)
- Afrikaans – Intermediate
- Oshiwambo – Native

Extracurricular & Interests

- **UNAM Metallurgical Society** – Active member (2024-Present)
- **Women in STEM Mentorship Program** – Mentee (2025-Present)
- **Geology Hikes** – Exploring Namibia's mineral deposits
- **Space Metallurgy Enthusiast** – Passionate about extraterrestrial resource extraction
